## Anti-Gravity Treadmill™

The AlterG<sup>®</sup> VIA Anti-Gravity Treadmill™ changes what's possible in rehabilitation and training. With unmatched precision and control, the VIA combines revolutionary Differential Air Pressure (DAP) technology, an intuitive touchscreen interface, real-time gait analytics, and live video monitoring – all to enable the ultimate in pain-free and fall-safe body weight supported walking, running, and closed-kinetic chain exercise. Now you can help diverse ortho and neuro patients, active seniors, and athletes to gain mobility, recover smarter, and achieve performance goals sooner.

## NEW DESIGN

### Smooth Setup

Open-back cockpit design with light and easy height adjustment, inseam set-point measurements and smooth-set locking mechanism to make entry and setup simple.

### Accessible Design

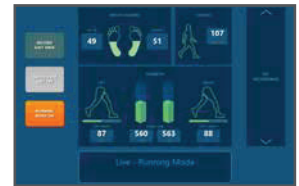

Snap-up, magnetized air chamber closure lays flat for ease of entry, while a new window design provides critical visual accessibility in a robust, functional design.

### Easy In, Easy Out

New, low step-up height ensures the easiest possible ingress-and-egress for users.

### Enhanced Data

AlterG Stride Smart provides valuable insight into gait and session data, allowing user-progress evaluation with essential data metrics.

Anti-Gravity  
Treadmill™

### Functional Safety

AlterG's patented DAP technology reduces gravitational forces and provides a fall-safe environment, while supporting unimpeded gait mechanics and balance.

# NEXT GENERATION AlterG. NEXT GENERATION YOU.
