Why do physiotherapists choose Elexeo ?

✓ **Less preparation time, more treatment time**
The user-friendly 10-inch touchscreen and plug-and-play modules ensure quick and easy operation. Save time and focus on your patient, not the device.

✓ **Mobile freedom**
Thanks to the battery module, you can easily take the Elexeo with you when you travel. Suitable for treatments in sports clubs or during home visits. Offer effective therapy anywhere you go.

✓ **Versatile treatment methods**
Easily combine electrotherapy and ultrasound in a single device.
You can switch immediately from one treatment method to another to achieve optimal results.

✓ **Modular design**
Start with what you need now and easily expand your range as your practice grows.

Elexeo

The modules in detail

Elexeo Therapy

- Start with an electrotherapy or ultrasound control unit.
- Easy-to-use 10-inch colour touch screen
- Anatomical library and instructional videos
- Automatic recognition and configuration of connected modules, such as:

Electrotherapy module

- Module for pain relief, muscle recovery and tissue regeneration
- Works with TENS, NMES and microcurrent
- Two independently adjustable treatment channels for simultaneous applications

Ultrasound module

- Promotes tissue repair and restoration of function in cases of musculoskeletal disorders
- Helps relieve pain and improve mobility
- Combine conventional ultrasound and LIPUS technology for a broad treatment spectrum

Vaco module

- Quick and easy electrode positioning
- Powerful, quiet and efficient vacuum system

Battery module

- Full mobility thanks to a long-lasting battery
- Easy to connect and lightweight
